

FOR IMMEDIATE RELEASE

Brigitflex Purchases 60 Inch Wide Chemcut Etcher for their Printed Circuit Board Production

Brigitflex Inc., a manufacturer of large circuit boards, has purchased a 60-inch-wide etcher from Chemcut, the United States' leading manufacturer and supplier of Develop/Etch/Strip equipment. The new etcher will be included with their Exellon 154L Vision Driller & Router System, along with their state of the art Autoclave machine. The new tool will be installed in their Elgin, IL. manufacturing facility.

Brigitflex, Inc. stated "We pride ourselves in being able to produce our own materials in our presses and adapt to new prototype products and specialty materials. The new Chemcut systems will allow us to continue the tremendous success Brigitflex has experienced over a 40 year history of a single owner company, and further expand our customer base. We can expect exceptional performance, excellent reliability, and low cost of ownership with our new Chemcut 60-inch etcher. Our advancement and continued success in multilayer flexible circuit board manufacturing along with large scale format customer designs.

About Chemcut

Chemcut Corporation, founded in 1956, was the original developer of conveyORIZED horizontal spray etching, a technique that made the chemical etching process practical for volume, as well as prototype production. Chemcut offers a complete line of spray etchers, developers, strippers, waste treatment systems, and auxiliary equipment. More than 15,000 Chemcut units are currently in operation around the world.

About Brigitflex

Brigitflex, Inc. is a woman-owned Midwest circuit board fabrication company, with a focus on specialty materials designed for the antenna industry. Brigitflex, Inc. is dedicated to meeting the unique and individual challenges of our customers using the customer's design, delivery schedule, and price points. We effectively communicate vendors, technical data, quality, and delivery status. Our goal is to achieve the continued confidence of our customers. Our extensive experience with multilayer, flexible, and large scale formats, allows us to convert complex design requirements on difficult to handle materials, into a documented process that can be repetitively manufactured. Involved and empowered technicians provide quick, responsive, person to person feedback, to our customers to resolve and document manufacturing issues.
